

Contents

Chapter 1. About the Notes	5
Chapter 2. Notation	7
Chapter 3. Innocent (Commutative) Algebra	9
1. Some Preliminaries	9
2. Algebraic Structures	11
Chapter 4. Category Theory	15
1. Introducing Categories	15
Chapter 5. Homological Algebra	17
1. Short Exact Sequences and Chain Complexes	17
2. Chain Complexes and Chain Maps	20
3. Snake's Lemma	21
4. Abelian Categories and Homotopy Category of Complexes	22
5. Mapping Cones and Triangulated Category	24
6. Projective Resolutions and Dimension	25
7. Derived Functors and Ext	31
8. Short Notes on K_0 and Sheaf Cohomology	36
9. Spectral Sequences	39
10. More on Derived Categories	45
Chapter 6. (Just Enough) Algebraic Geometry	47
Chapter 7. Topos and Sheaf Theory	49
Chapter 8. A Prelude to Stack and Deformation Theory	51
Chapter 9. EGA and SGA	53
Chapter 10. Postlude	55
Bibliography
