

## Contents

Chapter 1.	About the Notes	5
Chapter 2.	Notation	7
Chapter 3.	Innocent (Commutative) Algebra	9
Chapter 4.	Category Theory	11
1.	Introducing Categories	11
Chapter 5.	Homological Algebra	13
1.	Short Exact Sequences and Chain Complexes	13
2.	Chain Complexes and Chain Maps	16
3.	Snake's Lemma	17
4.	Abelian Categories and Homotopy Category of Complexes	18
5.	Mapping Cones and Triangulated Category	19
6.	Projective Resolutions and Dimension	21
7.	Derived Functors and Ext	26
8.	More on Derived Categories	27
9.	Spectral Sequences	27
Chapter 6.	(Just Enough) Algebraic Geometry	29
Chapter 7.	Topos and Sheaf Theory	31
Chapter 8.	A Prelude to Stack and Deformation Theory	33
Chapter 9.	EGA and SGA	35
Chapter 10.	Postlude	37
	Bibliography	39
